

GOT A GENERATOR YOU NO LONGER NEED? LET US TAKE IT OFF YOUR HANDS!

Diesel Electric Power purchases quality used machines from commercial organisations, companies and dealers. Whether circumstances have changed and you no longer need your generator or you are looking to upgrade, we can advise and take care of everything with a comprehensive service. We will buy any generators that are in reasonable condition anywhere in Ireland, Europe and beyond. If you are thinking about selling your used generator, then we can help.

If you have a good running industrial or commercial sized generator to sell then we will carry-out a free survey to determine:

- 🔧 **Valuation of equipment**
- 🔧 **Removal cost**
- 🔧 **Logistics plan, if local authorities need to be involved**
- 🔧 **Develop a project plan and key date timelines for larger decommissions**
- 🔧 **Advice and proposals on replacement equipment**

To ensure your business continues as normal, we will decommission your generator and take care of freight and all of the logistics. We carry out the same quality tests we would on our own equipment to make sure we offer a true price that will be highly competitive in the market.
